

Slime

Pour about half a cup of PVA glue into a container

Add a few drops of food colouring

Mix well

Optional - add about a tablespoon of shaving foam

Add about ¼ teaspoon Bicarbonate of Soda

Mix well

Add about ½ teaspoon of Optrex Eye Wash (or similar). This must contain Borate

Mix well

The slime will come together and form a sticky loop. Knead the loop a bit if it is too sticky. Adding more eye wash will make a stiffer slime.
